

Exercise 1

html & pdf output

2021-09-28

- A **pdf** document uses latex under the hood to compile a **.tex** file to **pdf**.
- In LaTeX a table is written as (we will explain the syntax next week; we are just trying to highlight different code react to different output structure)

Var1	Var2
1	2
3	4

- A markdown table is written as (see source Rmd file)

Var1	Var2
1	2
3	4

- This is a html table:

Var1

Var2

1

2

3

4

Challenges

1. **knit** this document to get a pdf output
2. Change this document output format to **html**.
3. **What happened to the table written in LaTeX?**
